Name: Jack Seprarovic

DOB: Aug 12 1996

Email: JSeprarovic@gmail.com

BIO: Jack works as a Safety Consultant at Abbott Risk Consulting with experience in the Oil & Gas industry, working on projects with some of the largest operators and engineering firms in Australia, The UK, Singapore, Malaysia and Qatar. Some of the work Jack has undertaken in his role includes the development of Fire Risk Assessments, Dispersion and Flare Radiation Studies, Non-Flammable Hazard Assessments, Dropped Object Studies and more.

Jack graduated with distinction from the University of Western Australia in 2020 as a Chemical Engineer. According to Jack, the best part of his degree was undertaking two internships with BHP and GHD at the Kalgoorlie Nickel Smelter and the GHD Perth office, where he learnt a lot about the type of engineer he wanted to be!

In his spare time, Jack loves music festivals and going on fishes trips with closest friends. He is also passionate about cooking, and would have considered being a chef if had not selected engineering!

Qualifications:

- Master of Professional Engineering (Chemical Engineering)
- Bachelor of Science Majoring in Chemical Engineering

Name: Julia Tana

DOB: Feb 27 1995

Email: Julia.Tana46@gmail.com

BIO: Julia has been working in the legal industry for the past 5 years as a Legal Assistant, despite studying a degree in Environmental and Marine science. Even though Julia thoroughly enjoyed her degree, she decided to take up the role of a legal assistant, because it could provide her a balanced work-schedule where she can also make time for her family and friends. Julia admits the work of a legal assistant is quite demanding, but also extremely rewarding and suits her lifestyle perfectly!

Her typical tasks involve formatting and drafting correspondence and various legal precedents' such as settlement documents, preparing and filing court forms, matter openings, collating briefs and general accounts and end of month billing processes. In her spare time, Julia likes to attend reformer Pilates classes, snorkel and bake sweets.

Qualifications:

- Bachelor's Degree – Environmental and Marine Science

Name: Pranab Pai

DOB: Mar 01 1993

Email: PranabPai25@gmail.com

BIO: works as a Rolling Stock Specialist SME for the Maintenance and Engineering Centre of Excellence department at BHP. Started my professional career in heavy haul rail in 2018 as a maintenance engineer for the rolling stock fleet of Riotinto in a FIFO role for 2 years before moving to BHP. I have been working on heavy haul rail since the time I graduated. Some of the responsibilities I have carried over the 4 years include attending to train breakdowns, dealing with ore car and locomotive maintenance, upgrade and enhancement of instrumented wagons and developing long term rail strategies that add value to the overall production.

Used to compete actively in motorsports before I took up engineering, so, outside of work, I spend a lot of time working on my car, enjoy long solo drives hence I travel a lot. I am always interested to catchup on current affairs of the world or read a book when I get time to sit and relax. I would have continued to build a career in motorsports if I did not become an engineer.

Qualifications:

- Master of Professional Engineering (Mechanical Engineering)
- Bachelor of Mechanical Engineering
